Trichomoniasis . Trichomoniasis is the most common curable STD, with infection more common in women than in men. Some women may mistake this infection for a yeast infection or bacterial vaginosis since the symptoms are similar: frothy discharge, strong vaginal odor, pain during intercourse, irritation, and itching.. Men can get trichomoniasis, but they don't tend to have symptoms.

The Most Common Sexually Transmitted Diseases (STDs)

STDs don ' t always cause symptoms or may only cause mild symptoms, so it is possible to have an infection and not know it. That is why it is important to get tested if you are having sex. If you are diagnosed with an STD, know that all can be treated with medicine and some can be cured entirely.

template <class T> void swap (T& a, T& b) { T c(a); a=b; b=c; } Notice how this function involves a copy construction and two assignment operations, which may not be the most efficient way of swapping the contents of classes that store large quantities of data, since each of these operations generally operate in linear time on their size.

Returns the stored value by val. This is a type-cast operator: evaluating an atomic object in an expression that expects a value of its contained type (T), calls this member function, accessing the contained value. This operation is atomic and uses sequential consistency (memory_order_seq_cst).To retrieve the value with a different memory ordering, see atomic::load.

Note. A using directive can be placed at the top of a .cpp file (at file scope), or inside a class or function definition. In general, avoid putting using directives in header files (*.h) because any file that includes that header will bring everything in the namespace into scope, which can cause name hiding and name collision problems that are very difficult to debug.
