The process of changing energy from one form to another is called energy conversion. For example, a light bulb changes electrical energy into

Section 15.1 Energy and Its Forms

Energy transformation, also known as energy conversion, is the process of changing energy from one form to another. In physics, energy is a quantity that provides the capacity to perform work (e.g. lifting an object) or provides heat. In addition to being convertible, according to the law of conservation of energy, energy is transferable to a different location or object, but it cannot be ...
