The Land Rover 300Tdi engine was an evolution upon the earlier 200Tdi with many improvements and refinements for better on road performance. However, it has the same capacity and power as its predecessor and slightly worse fuel consumption, which has lead some people to downgrade to the 200Tdi given the option.

A common fault with turbo charged engines is a stuck waste gate valve. This usually happens if the engine has not been run for a while. If the waste gate is stuck shut it will cause the engine to over boost, and in turn damage the engine. The waste gate actuator and rod are located behind the turbo (300 Tdi).
