Caterpillar wasn't using the best gaskets. In later models this was fixed, but it remained an issue throughout the early production of these engines. Another cause of these oil leaks is hardened rubber plugs near the back of the engine block due to aging. The age of your engine is definitely something to consider. Even though the 3406E engines were unbeatable in their heyday, time may start to play a role in these oil leaks.

This was fixed when the engine upgraded to the C15, and seals replaced gaskets, along with a new block design. The 3406Es have holes in the block as an optional way to check oil level, which are stoppered with rubber plugs. After a few years, this rubber will harden, which can cause oil leaks as well.
