~~Jain Selecting The Right Security Camera Which Style/Type of Security Camera Should I Buy? A Cctv Camera And Lens~~

A security camera lens size determines the field of surveillance view and zoom level that the camera provides. A 3.6mm lens is designed to provide an approximate 78° field of view and is the perfect camera in most CCTV applications. Most people think that a 3.6mm lens won't show a large field of view, but as you can see from the below images, there's not a huge difference between a 2.8mm and 3.6mm lens.

~~What's the difference? - CCTV Direct~~

2.8mm for a 90° view. With a wide field of view, the 2.8mm lens is a popular choice for static camera surveillance. It can cover a wide area with just one camera. The 2.8mm lens is very popular indoors. This is because you only need one camera mounted in a corner to monitor a whole room.

Computar CCTV Lenses provides over 200 state-of-the-art lens products giving you the flexibility needed to get the precise angle of view for every application. Computar lenses are employed extensively in high-security applications such as airports, banks, government buildings and commercial industries. Varifocal lenses offer maximum flexibility in camera installations requiring a wide range of focal lengths.

~~CCTV Camera Lenses - Online Security Products~~

In a nutshell, CCTV security camera lenses contain either a fixed lens (also called monofocal lens) or varifocal lens. A fixed lens camera's focal length (2.8mm, 4mm, etc) is fixed or permanently set, meaning that the field of view's focal length cannot be changed or adjusted without using a different camera. In contrast, a varifocal lens allows you to adjust the camera's focal length for your specific needs but are typically more expensive than fixed lens camera.

~~CCTV Security Camera Lens Guide - CLEAR IT SECURITY~~

The simplest CCTV lens is a piece of glass (or plastic) to focus the light from the outside world onto the camera's imaging sensor. This lens' only adjustable mechanism is its focus-ring, part of the barrel body, which you turn until your image is as clear as possible. Incidentally, use the sharpest test monitor you can.

A security camera lens size determines the field of surveillance view and zoom level that the camera provides. The camera lenses that CCTV Camera Pros supplies generally range from 2.5mm to 100mm. The larger the size of the lens, the more narrow and zoomed in the field of view is. Some of our fixed lens cameras come standard with a 3.6mm or 6mm lens.
