Though PROC NLP and CALIS in SAS ® can accommodate Deming regression models, these procedures are not widely used, and may not be easily understood by many applied statisticians. This paper will present a macro that

Read Online A Sas Macro For Deming Regression

uses multiple DATA steps and PROC MEANS statements to calculate the slope and intercept of the Deming regression line.

information to the SAS log.

In the below example the value of the variable 'today' is written to the program log.

```
data _null_;  
CALL SYMPUT ('today', TRIM  
(PUT  
("&sysdate"d,worddate22.))));
```

Read Online A Sas Macro For Deming Regression

`run; %put &today;` When the above code is run we get the following output.
