Tutorials | Access All In One

Reports are one of the most powerful features in MS Access. They are used to summarise data and present it in a way which is relevant, easy to understand and useful for the end user. In MS Access reports use the banded design concept whereby (similar to continuous forms) records from a table or query are displayed flowing vertically down the page.

Access All In One | Access Made Easy

Microsoft Access 2010 provides a rich platform for developing database management solutions with easy-to-use customization tools. If no end-user customization is required (including report modifications), you can choose to distribute those Access 2010 solutions so that they run without requiring a full installation of Access 2010 .
