The most common types of dementia – Alzheimer 's disease, vascular dementia, dementia with Lewy bodies and frontotemporal dementia – are all progressive. This means that the structure and chemistry of the brain become increasingly damaged over time. The person 's ability to remember, understand, reason and communicate will gradually decline.

Alzheimer's disease is one specific cause of dementia (and the most common). Some other causes of dementia include: Vascular dementia, where a lack of oxygen to the brain causes nerve cells to die. This can be caused by a stroke, a series of mini strokes or a disease of the small blood vessels in the brain.

~~What is the difference between dementia and Alzheimer's...~~

Alzheimer disease is the most common form of dementia and possibly contributes to 60-70% of cases. Other types of dementias include vascular dementia, dementia with Lewy bodies, and a group of diseases that contribute to frontotemporal dementia. The boundaries between subtypes are indistinct and mixed forms often co-exist.³

~~Background Paper 6.11 Alzheimer Disease and other Dementias~~

Alzheimer's disease is the most common cause for dementia, accounting for 60-80% of all diagnoses. Overall, know that Alzheimer's disease is a specific disease, while dementia is a general term for a group of similar diseases, of which Alzheimer's is one.

~~The difference between Alzheimer's disease and other dementia~~

Dementia is not part of normal ageing. Everyone gets more forgetful as they get older that does not mean that they have dementia. The most common type of dementia is Alzheimer's disease, but there are several other types. There is a lot of myth and misinformation about dementia.

American Journal of Alzheimer's Disease and other Dementias® (AJADD) is an open access journal for researchers, physicians, nurses, psychiatrists, nursing home and assisted living administrators, and other healthcare professionals who deal with patients with dementias every day. AJADD publishes original research, case studies and media reviews on all aspects of Alzheimer's and dementia.

~~American Journal of Alzheimer's Disease & Other Dementias~~

Alzheimer's is a degenerative brain disease that is caused by complex brain changes following cell damage. It leads to dementia symptoms that gradually worsen over time. The most common early symptom of Alzheimer's is trouble remembering new information because the disease typically impacts the part of the brain associated with learning first.

~~Dementia vs. Alzheimer's Disease: What Is the Difference...~~

Alzheimer's disease is a progressive, neurodegenerative disorder that causes disorientation and behavioral changes, and obstructs memory, thinking, and judgment. Symptoms usually develop slowly and worsen over time. Alzheimer's disease is not a normal part of aging.

~~Alzheimer's Disease and Other Dementias~~

Alzheimer's disease is most common in people over the age of 65. The risk of Alzheimer's disease and other types of dementia increases with age, affecting an estimated 1 in 14 people over the age of 65 and 1 in every 6 people over the age of 80. But around 1 in every 20 cases of Alzheimer's disease affects people aged 40 to 65.

~~What's the Difference Between Dementia and Alzheimer's ...~~

Worldwide, 50 million people are living with Alzheimer's and other dementias. Alzheimer ' s disease is a degenerative brain disease and the most common form of dementia. Dementia is not a specific disease. It's an overall term that describes a group of symptoms.

~~Alzheimer's & Dementia | Alzheimer's Association~~

Dementia is a serious health challenge. By some estimates, the number of people living with dementia could triple by 2050. While Alzheimer's disease is the most common cause of dementia, many related types of dementia also affect adults worldwide. Although the diseases that cause dementia have long been considered unrelented and incurable, there is hope.

~~Mayo Clinic on Alzheimer's Disease and Other Dementias ...~~

Alzheimer's is the most common cause. Other causes include brain changes that lead to vascular dementia, Lewy body dementia, and frontotemporal disorders.
