Amada Promecam Hydraulic Press Brake Control troubleshooting

For downstroking Press brakes, AMADA PROMECAM has retained the principle of constant parallelism, by using a composite beam, which has been patented in 20 countries. The mastery of deflection is of greater consequence to precision bending, as without it, electronic and hydraulic monitoring on press brakes cannot be claimed as being effective.

AMADA ' s Fixed Height (AFH) press brake tooling reduces setup time, limits clamp interference and creates precise bend angles. AFH tooling utilizes punch profiles that are taller and narrower providing a larger part bending area. Multiple punch and die profiles have a common height, making brake setup fast and stage bending easy.
