An evidence-based approach to decision-making is based on a combination of using critical thinking and the best available evidence. It makes decision makers less reliant on anecdotes, received wisdom and personal experience – sources that are not trustworthy on their own.

Evidence-based Practice for Effective Decision-Making—

Evidence-based practice is the idea that occupational practices ought to be based on scientific evidence. That at first sight may seem to be obviously desirable, but the proposal has been controversial. Evidence-based practices have been gaining ground since the formal introduction of evidence-based medicine in 1992 and have spread to the allied health professions, education, management, law, public policy, and other fields. In light of studies showing problems in scientific research, there is a

~~Evidence-based practice—Wikipedia~~

Evidence-based practice (EBP) is a process in which the practitioner combines well-researched interventions with clinical experience and ethics, and client preferences and culture to guide and inform the delivery of treatments and services.

An Evidence-Based Approach—Evidence-Based Social Work—
