These are four of the biggest issues I see in youth sports. In this particular situation, I think every party involved can shoulder some blame. The athlete should have toughed it out, the parents should have found a better venue to deal with this, the coach should have known better, and the league could have done more.

Sport is a microcosm of society. That is, what we see in society, we will likely see in sport, including body image issues. Unfortunately, those issues tend to be more complex and conflicted for athletes, especially female athletes, than for the general population. Athletes have the same risk factors as non-athletes, but they also have risk factors unique to the sport environment or to a particular sport (Thompson & Sherman, 2010).

By Margot Putukian. Injuries, while hopefully infrequent, are often an unavoidable part of sport participation. While most injuries can be managed with little to no disruption in sport participation and other activities of daily living, some impose a substantial physical and mental burden. For some student-athletes, the psychological response to injury can trigger or unmask serious mental health issues such as depression, anxiety, disordered eating, and substance use or abuse.

Source: American College of Sports Medicine William W. Dexter, MD & Michael F. Bergeron, PhD. Athletics are as much a part of American high school culture as prom night and geometry. Yet, sports programs gone amok can sometimes lead to misplaced priorities and unbalanced budgets, as thoughtful journalist and author Amanda Ripley noted recently in The Atlantic.
