Atomic structure and isotopes answers give the chemical symbol for the following isotopes including the atomic number and mass number. Which of the atoms represented by these symbols are isotopes of each other. Isotopes are atoms of the same element with different mass numbers. The number of protons in an atom is known as the of that atom. Uranium 235 and uranium 238 are considered isotopes of one another. No carbon 12 and carbon 13 are isotopes of carbon but have different mass numbers.
