However, despite the available treatment options for patients who progress beyond first-line therapy ... Some of these compete with the ATP binding site of the catalytic domain of several

...

### New Oral Multitargeted Antiangiogenics in Non-small-cell Lung Cancer Treatment

It was clear to viewers at home that Garçon had come down short because of the well-placed, digital yellow first down line projected ... points in ATP and WTA events in 2010, the last year

...

### Blood, Sweat and Data

At low AMP:ATP (adenosine triphosphate) ratios, ATP inhibits AMPK by increasing AL dynamics and accessibility. We developed conformation-specific antibodies to trap ATP-bound AMPK in a fully inactive, ...

### Structure of an AMPK complex in an inactive, ATP-bound state

Further experiments are needed to verify the potential of SARS-CoV-2 DIs as antivirals. Our experiments should be repeated in human lung cell lines, against other variants of SARS-CoV-2 and by ...

### A synthetic defective interfering SARS-CoV-2

A separate line of investigation has described the spatial organization ... phase shifts of the BOLD signal relative to arousal are network-dependent in cortical and subcortical structures,

(iii) ...

Global waves synchronize the brain ' s functional systems with fluctuating arousal  
First, the standard 12-lead ECG is a 10-second strip. The bottom one or two lines will be a full  
“ rhythm strip ” of a specific lead, spanning the whole 10 seconds of the ECG. Other leads  
will ...

Approach to ECG Interpretation

1E and fig. S1A). One patient (III.3) presented with additional dilated cardiomyopathy at 13  
years of age, which evolved into chronic cardiac decompensation, necessitating cardiac  
transplantation at ...

Familial autoinflammation with neutrophilic dermatosis reveals a regulatory mechanism of  
pyrin activation

In osteosarcoma and breast cancer cell lines that maintain telomere length through ALT, the  
telomere-binding protein RAP1 was SUMOylated, dissociated from telomeres, and localized to  
the cytoplasm.

SLX4IP promotes RAP1 SUMOylation by PIAS1 to coordinate telomere maintenance through  
NF- B and Notch signaling

The crystal structure of the FN3K homolog from Arabidopsis thaliana revealed that it forms  
an unexpected strand-exchange dimer in which the ATP-binding P-loop and adjoining
