Benefit/Risk Tradeoffs in Assessment of New Drugs and ...

Benefit-risk methodology. The European Medicines Agency's opinions are based on balancing the desired effects or 'benefits' of a medicine against its undesired effects or 'risks'. The Agency can recommend the authorisation of a medicine whose benefits are judged to be greater than its risks. In contrast, a medicine whose risks outweigh its benefits cannot be recommended for marketing.

Benefit-risk methodology | European Medicines Agency

In this White Paper, we describe approaches to benefit-risk assessment using qualitative approaches such as the Benefit Risk Action Team framework developed by the Pharmaceutical Research and Manufacturers of America, and the Benefit-Risk Framework developed by the United States Food and Drug Administration; and quantitative approaches such as the numbers needed to treat for benefit and harm ...

Benefit-Risk Tradeoffs in Assessment of New Drugs and ...

Medicines Safety: Benefits and Risks. No effective medicine is without risk and every medicine will have side effects which may occur in some patients. This is why the benefits of a medicine should always be weighed up against its risks to the individual patient and the benefit /versus- risk balance should be acceptable to the patient for their individual circumstances following consultation with their healthcare professional (e.g. doctor or pharmacist).
