Solution: By continuity equation:  $v_2 = (A_1 v_1) / A_2 =$   
 $( (5.0 / 2)^2 (0.60) ) / ( (2.6 / 2)^2 ) v_2 = 2.2 \text{ m/s.}$

By Bernoulli ' s Equation:  $P_1 + \rho g h_1 + \frac{1}{2} \rho (v_1)^2 = P_2$   
 $+ \rho g h_2 + \frac{1}{2} \rho (v_2)^2$  ( $P_o =$  atmospheric pressure)  $P_2$   
 $= (3.8 \times P_o) + P_o + \frac{1}{2} (1000) (0.6)^2 - (1000) (9.8)$   
 $(20) - (1000) \frac{1}{2} (2.2)^2. P_2 = 2.8 \times 10^5 \text{ Pa.}$

### Bernoulli Principle Problems And Solutions

Bernoulli's principle (or Bernoulli's equation) is a formula that relates the height, density, pressure, and velocity of a non-viscous and non-conducting fluid. It states that  $p + \rho g h + \frac{1}{2} \rho v^2 = \text{constant}$ ,  $p$  is the pressure,  $\rho$  is the density,  $h$  is the ...

Bernoulli Equation Practice Worksheet . Problem 1 .  
Water is flowing in a fire hose with a velocity of 1.0 m/s and a pressure of 200000 Pa. At the nozzle the pressure decreases to atmospheric pressure (101300 Pa), there is no change in height. Use the Bernoulli equation to calculate the velocity of the water exiting the nozzle.

Bernoulli's equation, a simplified form of the law of conservation of energy. It applies to fluids that are incompressible (constant density) and non-viscous.

Bernoulli's equation is: 
$$P_1 + \frac{\rho v_1^2}{2} + \rho gh_1 = P_2 + \frac{\rho v_2^2}{2} + \rho gh_2$$
 Where.

SOLUTION As usual, begin by drawing a diagram of the situation, as shown in Figure 9.25. We ' re going to apply Bernoulli ' s equation, which means identifying two points that we can relate via the equation. Point 2 is outside the container where the hole is, because that is the place where we ' re trying to find the speed. Point 1 needs to be

## Pressure, Speed, and Bernoulli ' s Equation in Physics Problems

Bernoulli ' s principle, sometimes also called the Bernoulli effect, is one of the most important results in study of fluid dynamics, relating the speed of the fluid flow to the fluid pressure. This might not seem particularly important, but as the huge range of phenomena it helps to explain shows, the simple rule can reveal a lot about the behavior of a system.
