## Respiration Chapter Notes

~~Weekly~~ Aerobic respiration: is the term for chemical reactions in cells that use oxygen to break down nutrient molecules to releases energy. The word aerobic means that oxygen is needed for this chemical reaction. The food molecules are combined with oxygen.

### ~~12.2) Aerobic respiration •~~ ~~A\* Biology~~

Usually, aerobic respiration takes place in humans, but under certain conditions, anaerobic respiration may also occur in our muscles for a short time, due to temporary deficiency of oxygen. When we perform a heavy exercise like running,
