Prostate biopsy—**Mayo Clinic**

Following a prostate biopsy the tissue samples are examined by a pathologist to determine whether the samples taken are cancerous and if cancer is present they must also estimate how aggressive it is. Sometimes however prostate cells examined under a microscope may not appear cancerous but they don't appear quite normal either.

How To Interpret The Results Of A Prostate Biopsy==

Because prostate biopsies are tissue samples from different areas of the prostate, the Gleason score on biopsy usually reflects your cancer's true grade. However, in about 1 out of 5 cases the biopsy grade is lower than the true grade because the biopsy misses a higher grade (more aggressive) area of the cancer.
