In this short and advanced tutorial, MaryPoplin, imagineer systems Product specialist, shows you how to use manual track on simple and complex planar tracks to correct drift and other tracking problems. Manual Track is usually used when the object you are tracking is completely obscured or becomes untrackable, like laptops closing or turning away from the camera, or faces turning away from camera.

It is those for Boris FX that stump me. Since Lightworks now effectively incorporates Boris, shouldn't Lightworks be providing tutorials themselves? I still haven't found an introduction to Boris. I know there is a problem as Boris looks different depending upon the host program which is why I say LWK should produce their own guide. Menu.
