

What Were Your First Signs and Symptoms of a Brain Tumor?

A general symptom is caused by the pressure of the tumor on the brain or spinal cord. Specific symptoms are caused when a specific part of the brain is not working well because of the tumor. For many people with a brain tumor, they were diagnosed when they went to the doctor after experiencing a problem, such as a headache or other changes.

Brain Tumor: Symptoms and Signs | Cancer.Net

The brain tumor refers to a growth or mass of irregular cells in one's brain. Brain tumors are of various types; some are malignant or cancerous while some are benign or non-cancerous. The benign tumors are also called primary cancer of a brain. They originate into the brain by itself or the nearby tissues such as cranial nerves, pineal gland or pituitary gland, and meninges (membranes that ...
