Right hand thread for Bridgeport mill, left hand thread for Imports. If the nosepiece does not unscrew this means the threads of the nosepiece are bad You may never get it off without damaging the nosepiece and or quill. It can be very expensive to replace both nosepiece and quill. At this point most people live without the Collet screw and just put it back together With the nosepiece removed ...

I have questions about the manual feed handle assembly. When I bought my mill, the handle had been "repaired". The extent or the "repair" was that the handle was welded into the hub, the original pin was ground off, the hub was drilled and fitted with a new pin. The new pin was some type of soft steel which has worn on the tip, and bent slightly.
