~~Broadband Cable Access Networks [Book]~~

~~In telecommunications, cable Internet access, shortened to cable Internet, is a form of broadband Internet access which uses the same infrastructure as a cable television. Like digital subscriber line and fiber to the premises services, cable Internet access provides network edge connectivity from the Internet service provider to an end user. It is integrated into the cable television infrastructure analogously to DSL which uses the existing telephone network. Cable TV networks and telecommunica~~

~~Here is a list of the prominent broadband Internet access providers in the United Kingdom. This article only lists providers of residential service, i.e. that provided via a fixed line. For mobile broadband providers, see List of mobile operators in the United Kingdom.~~

~~List of broadband providers in the United Kingdom – Wikipedia~~

~~A fibre optic cable is made up of very thin strands of glass which laser light is beamed down at incredibly fast speeds (quite literally the speed of light!) to carry data. Fibre optic broadband brings superfast, ultrafast or even hyperfast internet access to your home. It is significantly quicker than standard phonline broadband, with ...~~

~~Fibre Optic Broadband~~

~~There are several factors specific to the broadband access network that can influence latency as well, including the physics of the medium being used, the mechanism by which that medium is used to transmit data (medium access control), and the network architecture (physical topology) of the local network prior to its point of interconnection with the rest of the wider Internet. The use of coaxial cable in access networks does not place cable broadband at any inherent latency disadvantage ...~~

~~Cable Broadband Technology Gigabit Evolution – CableLabs~~

~~Why choose cable broadband? Cable broadband is much faster than the slower, copper-cabled standard broadband. It can make downloads and uploads faster, and generally improves your online experience. Download films, music, and data at high speed. From music streaming to film and videogame downloads, everything is faster with cable broadband.~~
