Caterpillar is being sued by frustrated customers over failures, ineffective repairs and financial losses in C13 and C15 ACERT engines, according to a report by Truckinginfo.com. The law suit was filed in March by Miller, Curtis & Weisbrod LLC, of Dallas, TX on behalf of three Oklahoma-based trucking companies who bought a total of 90 C15 engines in 2007 and 2008.

news: Caterpillar sued over C13/C15 engine problems
the trucking company i work had rough 200+ of c13 engines when they first came out few of them did not make 70 miles,had to replace the motor cause of no power. when the c13s got to 200000 to 250000 miles,all of them got overhauled do to oil consumption and lack of power,spent several months doing tests overhaul was the only answer.when these engines got to 450000 to 500000 mile either they got overhauled again,or head repairs if they did not through a rod out the side of the block,also ...

Viewing a thread - Cat C-13 engine, good and bad. It is a 2005
This is because CAT is exiting the truck market, has a very bad reputation for reliability, and is known as a the worst engine for fuel mileage. All of this is bad enough, but the C13 has a history of actuator problems that are extremely problematic. Still, a Mercedes is even worse. The same truck with a Mercedes is \$19,000.

CAT Faces Fresh Litigation over Repeated C13, C15 ACERT ...
This is a common problem on the C13 engines. There are two things I have seen cause low oil pressure. The first and most common is a faulty relief valve in the oil filter base. I see this a lot. Basically the housing and valve stick open and lower oil pressure. To repair the housing and valve needs to be replaced. Second is a weak oil pump.

Cat C13 low oil pressure. - JustAnswer
The Caterpillar C13 engine boasts an impressive 520 bhp. However, it was the C13 that caused Cat to be sued by dissatisfied customers over failures, poor repairs, and financial losses. Those who purchased this engine in 2007 and 2008 experienced problems relating to the diesel particulate filter regeneration system such as clogged injectors, sensor defects, and fuel line issues.
