Cf6 80a Engine

The General Electric CF6, US military
designation F103, is a family of high-bypass
turbofan engines produced by GE Aviation.
Based on the TF39, the first high-power high-
bypass jet engine, the CF6 powers a wide
variety of civilian airliners. The basic
engine core also powers the LM2500, LM5000,
and LM6000 marine and power generation
turboshafts.

during extended twin operations (ETOPS) testing.

The CF6 Engine | GE Aviation
CF6-80A Engine Designed for short-to-medium range commercial jets, the CF6-80A has been in service since the late 1970s. Delta TechOps has serviced these engines since 1982.

CF6-80A Engine - Delta TechOps | CF6-80A
It is an advanced development of the earlier successful General Electric CF6-50 series engine. It is divided into 3 distinct families. CF6-80A Series. The CF6-80A, which has a thrust rating of 48,000 to 50,000 lb (214 to 222 kN), powered two twinjets, the Boeing 767 and Airbus Industrie A310. The GE-powered Boeing aircraft entered airline service in 1982, the GE powered A310 in early 1983.

General Electric CF6-80
The CF6 is a two-shaft turbofan which powers medium- to long-haul Airbus and Boeing wide-body aircraft. For the CF6 MTU Aero Engines produces turbine and compressor parts. Having been manufactured for over 40 years, this engine now figures more and more importantly in MTU's repair and spare parts business.

CF6 CF6 (MRO) MTU has been a risk-and-revenue
sharing partner in this GE Aviation engine
program since 1971, when the company produced
the first parts for the CF6-50. In the
meantime, MTU manufactures parts for the
entire CF6 family (CF6-6, CF6-80A, -80C,
-80E).

CF6 - MTU Aero Engines

A rotating disk within the General Electric
Co. CF6-80 engine had an "internal
inclusion," meaning foreign debris became
embedded within the nickel- and chromium-
based alloy designed to withstand the heat
and high stresses of a jet engine, according
to the NTSB.

Uncontained CF6-80 Failure: American B767-300
28 Oct 2016

The General Electric CF6 is a two-spool high-
bypass turbofan engine designed to power
large wide-body aircraft. The CF6 has a long-
standing proven operational record having
accumulated more than 400 million flight
operating hours with more than 250 customers

CTS Engines offers its Maintenance, Repair, and Overhaul ("MRO") customers outstanding service and value for full overhauls of the GE CF6-80C2, CF6-80A, CF6-50 and PW2000 series engines. We are committed to lowering our airline partners' per cycle engine maintenance costs, while at the same time maximizing length of time on-wing.

About Us - CTS Engines

The FAA is issuing this AD to prevent failure of the HPT stage 1 disk (CF6-80C2 engines) and the HPT stage 2 disk (CF6-80C2 and CF6-80A Start Printed Page 63195 engines). The unsafe condition, if not addressed, could result in an uncontained HPT disk release, damage to the engine, and damage to the airplane.
