Challenging Facts Of Childhood Obesity [PDF, EPUB, EBOOK]

In 2004, the House of Commons health committee reported that this could be the first generation where children die before their parents as a consequence of childhood obesity. Between 1995 and 2005 the proportion of obese children aged 2 to 15 increased from 10.9% to 18% in boys, and from 12 to 18.1% in girls.

Obesity in children - NHS

Obesity is generally caused by eating too much and moving too little. If you consume high amounts of energy, particularly fat and sugars, but do not burn off the energy through exercise and physical activity, much of the surplus energy will be stored by the body as fat. Calories. The energy value of food is measured in units called calories.
