Chapter 1: Introduction: Themes in the Study of Life

Oxford University Press. DOI:10.1093/acprof:oso/9780198567882.003.0001. This introductory chapter begins with a description of the book's main thesis and objectives. The book is structured around a number of core problems in food policy: governance, supply chain, nutrition and health, environment, behaviour and culture, social justice and poverty. When scrutinizing these in turn, the book explores a number of key cross-cutting themes.

Introduction and themes—Oxford Scholarship

This introductory chapter sets the scene both in terms of evolutionary themes and regional history. The two main evolutionary themes of the book — diversity and adaptation — are presented and the objectives of the book outlined. The purpose is to place the evolutionary processes which shape plant evolution firmly into the context of the three main historical influences on vegetation in the Mediterranean region: geological history, the development of the Mediterranean-type climate, and ...
