Climate economics: the state of the art - SEI

The Economics of Climate A New Climate Economy "EVERYBODY TALKS ABOUT the weather, but nobody does anything about it." The quip, attributed to 19th-century American humorist Mark Twain, might describe the current state of play on climate change. In Twain's day, it was absurd to suppose humans could do anything about the weather.

The Economics of Climate

Economic effects that are not readily measurable are excluded, as are costs incurred by countries other than the United States. In addition, if climate change has an impact on the growth rate (as ...

Ten facts about the economics of climate change and ...

The study projected that if the higher-temperature scenario prevails, climate change impacts on these 22 sectors could cost the U.S. \$520 billion each year. If we can keep to 2.8° C, it would cost \$224 billion less. In any case, the U.S. stands to suffer large economic losses due to climate change, second only to India, according to another study.

How Climate Change Impacts the Economy - State of the Planet

Economic climate. The economic climate is simply the general state of the overall economy, i.e., the economic conditions. The term refers to the current state of the economy of a nation, region, or the world. Economic climates change over time, depending on where in the business cycle we are. The business cycle is a cycle of recession and recovery that the economy goes through. Fluctuations in production and trade in a market economy cause the business cycle.

emissions under the Clean Air Act. The first finding is that six greenhouse gases – carbon dioxide (CO<sub>2</sub>), methane (CH<sub>4</sub>), nitrous oxide (N<sub>2</sub>O), hydrofluorocarbons (HFCs), perfluorocarbons (PFCs), and sulfur hexafluoride (SF<sub>6</sub>) – endanger the public health and welfare of current and future generations.

Economics of Climate Change | Environmental Economics | US EPA

To address this problem, Liz Stanton and I wrote *Climate Economics: The State of the Art*, which has just been published by Routledge. Our book grew out of a request from the World Wildlife Fund for an update on climate economics since the Stern Review. In that 2006 review, commissioned by the British government, Nicholas Stern argued persuasively for a new approach to the economics of climate change, emphasizing arguments for a very low discount rate and a focus on catastrophic risks.
