Guidance and Supporting Information

For every clinical situation a midwife experiences, her decision making will be influenced by the context and the choices and needs of the woman for whom she is providing midwifery care. Therefore these guidelines are intended as guidelines only rather than prescribed inflexible protocols which may not allow for the individual woman's context. In every given situation there must be opportunity for midwives to use sound judgement, to act with sound rationale and acknowledge the context when ...

Practice guidance - New Zealand College of Midwives - New ...

The Fifth Edition examines the transition to the use of ICD-10 codes, women's health policy and advocacy, risk assessment and decision-making in practice, and inspiring trust in midwifery care. New clinical practice guidelines include health promotion and primary care practice, such as promoting restorative sleep, optimizing oral health, promoting a healthy weight, and caring for the woman with a substance abuse disorder.

Clinical Practice Guidelines For Midwifery & Women's ...

A defining feature of midwifery care is the promotion and protection of physiological reproductive processes [1]. During the course of pregnancy and childbirth, midwives are constantly weighing the appropriate care for each individual woman, including when the assistance of specialised caregivers is needed.
