Communication can be about quietly projecting the energy that you are here, you are willing to listen, and you won't judge. That is the best therapeutic gift you can give your patient. Read the social cues. If they need you to be present, be present. If they are tired of talking, give them the space they need.

Communication | Search results page 1 | Evidence search | NICE

You must contribute to the safe transfer of patients between healthcare providers and between health and social care providers. This means you must: share all relevant information with colleagues involved in your patients' care within and outside the team, including when you hand over care as you go off duty, and when you delegate care or refer patients to other health or social care providers 8

poor communication | Search results page 1 | Evidence ...

Ineffective communication is the single largest factor behind litigation by patients. Good communication, including effective apology, can avert or help end conflict, especially litigation. It never does any harm to apologise—for yourself or on behalf of colleagues. Empathise and listen: Your relationship with the patient is vitally important. It facilitates therapeutic space in which patients can express their concerns and receive support and advice.

Improving your communication skills | The BMJ

It is essential for good and safe patient care that doctors work effectively with colleagues from other health and social care disciplines, both within and between teams and organisations. Whatever the composition of the teams you work in, you
