State-of-the-art in perspective, it highlights topics that affect logistics channels management - including customer service, packaging, inven. Using real-world case studies throughout, this exploration of "contemporary" logistics describes the entire supply channel system - from inbound movement of freight through materials management to physical distribution to customers.

~~Contemporary Logistics by Paul R. Murphy Jr.~~
application involves logistics information systems. A fifth general type of information system is decision support systems, with warehouse management systems being a logistics-related application. The sixth, and final, general type of information system is the enterprise system, represented by logistics modules of enterprise resource planning
