Docking Palettes - Corel USER to USER Web Board

Docking palettes in QuarkXPress. You can dock a palette or palette group to the left or right edge of your display by dragging it until a blue area appears around it. When you release the mouse, that palette (or palette group) positions itself in the optimum location against that edge. This docking feature also makes palette hiding possible.

QuarkXPress Palettes - dummies

Call CControlBar::EnableDocking for each toolbar you want to dock, specifying the destination sides to which the toolbar should dock. If none of the sides specified in the call to CControlBar::EnableDocking match the sides enabled for docking in the frame window, the toolbar cannot dock — it will float. Once it has been floated, it remains a floating toolbar, unable to dock to the frame window.
