~~Charles Darwin Facts for Kids~~

To explain this process Darwin formed his theory of natural selection. Darwin first presented his theory in 1858. The idea of evolution was not new then, but Darwin ' s theory explained how evolution occurred. When Darwin published On the Origin of Species in 1859, the book was an immediate success. However, it was not popular with people who believed that God created everything in the world all at one time.

Darwin changed the way the people of the world viewed themselves through his amazing ideas on evolution and natural selection. For thousands of years many philosophers believed that life must have been created by a supernatural being or God. According to Darwin, the millions of species present today evolved slowly over billions of years from a common ancestor. He called this process, natural selection.
