Wireless ECE Exam Data ~~Converters For Wireless~~ Standards

In 2002 and 2003,
WLAN products
supporting a newer
standard called 802.11g
emerged on the market.
802.11g attempts to
combine the best of both
802.11a and 802.11b.
802.11g supports
bandwidth up to 54
Mbps, and it uses the

Complementary Code

Keying (CCK) is a method for encoding transmissions for higher

data rates, such as 5.5 and 11 Mbps, but it still allows backward

compatibility with the original 802.11

standard, which

supports only 1 and 2

Mbps speeds. 802.11b

and 802.11g support this

transmission method.
