By explicitly teaching sight words, you can help cement the words into students' memories. Use this three-part strategy, which starts with sound-letter mapping, then moves to a flashcard activity, and ends with other ways to keep reinforcing the sight words with repeated exposure.

## **Literacy Strategy: How to Teach Sight Words**

For typical readers, word recognition abilities tend to be especially important in the early stages of learning to read, when children are learning phonics and developing the ability to read common sight words. Word-recognition skills tend to set a limit on reading comprehension in these early grades, because even if children have strong oral language comprehension skills, those skills cannot come into play while reading if they are unable to read many words.

## **Introduction: How Children Learn to Read | Reading Rockets**

Orthographic mapping (OM) involves the formation of letter-sound connections to bond the spellings, pronunciations, and meanings of specific words in memory. It explains how children learn to read words by sight, to spell words from memory, and to acquire vocabulary words from print. This development is portrayed by Ehri (2005a)
