600 Exercise 39 39 T he food we eat must be processed so that its nutrients can reach the cells of our body. First the food is mechanically broken down into small particles, and then the particles are chemically (enzymatically) digested into the molecules that can be absorbed. Food digestion is a prerequisite to food absorption.

39 Digestive System Processes: Chemical and Physical

Digestion Lab Answers Exercise 39 Digestion Lab Answers Exercise 39 • The acidity denatures proteins and inactivates most of the enzymes in food. • The acidity helps break down plant cell walls and the connective tissues in meat. • An acidic environment is essential for the activation and function of pepsin, a protein-digesting
