DNA...you hear about it all the time. DNA is used every day by

scientists and lawyers to help in criminal

investigation, paternity suits, cloning, etc. Your

DNA is your “genetic fingerprint”— this means that your DNA is like no one else’s in the world!

Extracting DNA from

Human Cheek Cells

2015. Abstract. The

purpose of this lab is to

have students extract

DNA or

Deoxyribonucleic Acid,

from their own cheek

cells. Cheek cells are

collected with purified

water and placed into a

Bookmark File

saline and soap solution.

When alcohol is added, the DNA precipitates from the solution and

thus the DNA is

observable. This lab has

been adjusted to use

equipment and materials

readily available within

a secondary classroom

and to fit within a 30

minute time period.

~~Human Cheek Cells~~

When you gargle the salt water and spit it back out, some of your cheek cells become suspended in the salt water. The more vigorously you gargle, the more cheek cells will collect in the salt water. The washing up liquid breaks down your cheek cell membranes. This causes the DNA to
