There is no specific cure for autism and therapeutic guidelines are directed to improve the quality of life of people with autism by reducing the symptoms and by increasing their functioning. Neurofeedback is a computerized method based on tracking electrical activity of the brain (EEG) and giving a feedback about it.

~~Neurofeedback application in the treatment of autistic ...~~

Neurofeedback is a treatment method that is lies under the broader umbrella of biofeedback. Biofeedback is a practice where clinicians gather information about your body functions, such as your heart rate, breathing, or temperature. They analyze the data they collect with you and use it to help you alter patterns in order to treat conditions.

~~Neurofeedback | BioLife Health Center | Weston Florida~~

Neurofeedback (NF) has gained increasing interest in the treatment of attention-deficit/hyperactivity disorder (ADHD) thanks to its documented benefits. What is Neurofeedback? Neurofeedback (NF) is a type of brain-biofeedback system that aims to improve the self-regulation of brain wave activity (most often using an electroencephalogram, EEG). Improvements from neurofeedback therapy have been shown to be similar to medication but without the unwanted side effects.

Neurofeedback Training for Your Brain

Neurofeedback involves learning by the brain and if that brings order out of disorder, the brain will continue to use its new capabilities, and thus reinforce them. Matters are different when we are dealing with degenerative conditions like Parkinson's or the dementias, or when we are working against continuing insults to the system, as may be the case in the autism spectrum.
