(PDF) Occupational therapy services in early childhood and ...

If a child needs support to develop optimally, occupational therapy can help. There are programs called early intervention across the country that are funded by federal, state, and local dollars. Early intervention is a collection of therapy and support services that provide children from birth to 3 years old who have disabilities, or who are at risk for developing them, the help they need to succeed later in life.

Occupational Therapy in Early Intervention: Helping ...

Occupational Therapy enables people to participate in daily life to improve their health and wellbeing. Daily life is made up of many activities (or occupations). Occupations for children and young people include self-care, being productive (attending nursery or school) and leisure. Occupational Therapists help babies, children and young people who may need support and advice if they are not able to do their occupations due to illness, disability or family circumstances.
