This requires a new approach to how we conduct ecological research, that views data as a resource and promotes stewardship, recycling and sharing of data. Ecological Data will be particularly useful to those ecologists and information specialists that actively design, manage and analyze environmental databases. However, it will also benefit a wider audience of scientists and students in the ecological and environmental sciences.

Environmental Data Management. Understanding today's environmental challenges requires the marshalling of world-wide information and data. Scientific, commercial and societal objectives depend on high quality data and analysis tools. CEH is developing increasingly sophisticated tools and services to manage and secure data for the long term, to deliver improved accessibility, visualisation and reuse of data, and to enable the integration and interoperability of heterogeneous datasets.
