How rugged devices can enable a new era of connectivity. Joe Walsh, director of B2B at Samsung UK & Ireland, discusses how rugged devices can become key enablers for a new era of connectivity. Rugged devices have a role to play in future connectivity exploits. Rugged devices are everywhere. If you have recently been to the supermarket, accepted a delivery, or had building work done on your house, it is likely a robust mobile or tablet would have been part of the process.

How rugged devices can enable a new era of connectivity

struggling to adapt to new end-user needs, governmental regulations and investor expectations, have the potential to benefit from the ever-expanding range of available space technologies and services. In particular, one of the industries most affected by these changes in the business environment is the global mining sector.

SPACE TECHNOLOGIES ARE ENABLING A NEW ERA OF MINING
