The scientific method Identically Different: Tim Spector at TEDxKingsCollegeLondon **Epidemiological Methods In Life Course**

Abstract. Life course epidemiology is developing rapidly in the context of new knowledge about the biology of development and ageing and gene-environment interplay. This book is concerned with design, measurement, and analysis of life course data. Study design chapters are concerned with models of the life course development of risk, the effect of individual differences, the study of genetic effects, and intervention in life course designs.
