An evidence-based practice means the doctor of chiropractic fully understands the patient's needs, values, and preferences then applies the right clinical treatments indicated by the newest evidence-based research. Put another way, Evidence-based Practice (EBP) puts patient care first. The treatments selected depend on several factors: The strength of the scientific evidence; An examination of the benefits and risks of all treatment approaches; The patient's preferences. Advantages of an ...

Institute of Evidence-Based Chiropractic: chiropractic ...

Evidence-Based Chiropractic Practice. Description. Evidence-based chiropractic (EBC) is a process of actively seeking support for and improvement of clinical practice through the integration of the best available research evidence, combined with the practitioner's clinical expertise and the patient's values. Research evidence does not supersede clinical decision making in EBC, rather it enhances the knowledge and skills of the practitioner to produce better patient care.
