The government recently announced it will be forming a Joint Biosecurity Centre, which looks as though it will run along similar lines to the Joint Terrorism Analysis Centre, with experts producing analysis and setting threat or alert levels allowing ministers to make informed policy decisions. This is very welcome. With hindsight, it seems extraordinary that there was previously no central ...

~~What is wrong with evidence-based policy making?~~

It has become increasingly clear over the course of the pandemic that there are many sources of uncertainty and disagreement around the evidence informing Government policymaking and its role. One stems from the fact that scientific results, even in relatively well-established and consensual fields, are always fallible and open to change, with the findings of different studies sometimes in conflict.
