"In her book Evolution Made to Order, Curry elucidates three major innovations in American plant breeding techniques during the 20th century—the use of X-rays, colchicine, and radioisotopes to bring about mutations and speed up evolution. Along the way, she introduces us to important plant breeders and scientists, including Albert Blakeslee, David Burpee, Bernard Nebel, Mable Ruttle, Arnold Sparrow, Lewis Stadler, Ralph Singleton, and others who strove to feed the world."
