Evolution. (Baxter novel) Evolution is a collection of short stories that work together to form an episodic science fiction novel by author Stephen Baxter. It follows 565 million years of human evolution, from shrewlike mammals 65 million years in the past to the ultimate fate of humanity (and its descendants, both biological and non-biological) 500 million years in the future.

Evolution (Baxter novel) - Wikipedia

In this book, Mr. Baxter tries something similar on a massive canvas - no less than the evolution of the human race from prehistoric past to distant future. It's a salutary reminder that we humans have been

on the planet for only a tiny proportion of its life, and that evolution marches on regardless.

Evolution (GOLLANCZ S.F.): Amazon.co.uk: Baxter, Stephen ...

In *Evolution*, Stephen Baxter tells the story of humankind itself, ranging from humanity's nraw beginnings in Purga the Purgatorius, dancing around the feet of dinosaurs and just barely surviving the comet-strike on the Yucatan Peninsula 65 million years ago; to paleontologist Joan Usub, on her way to participate i

Evolution, Stephen Baxter

Evolution is a novel by Stephen Baxter spanning 645 million years of Earth's history, with most chapters focusing on 65 million years ago to 30 million years in the future.

Evolution (Literature) - TV Tropes

Stephen Baxter's *Evolution* also charts the course of human history, but where Wells was content with broad brushstrokes, Baxter gives us a Technicolor panorama of human development, beginning 65...

Review: Evolution by Stephen Baxter | Books | The Guardian

Baxter makes an impressive job of putting flesh on to the bones of the scientific theory and in its imaginative vision *Evolution* deserves comparison with SF epics such as Olaf Stapledon's *Last and First Men* or Alfred Doblin's *Mountains, Seas, and Giants*. Baxter leaves you with a memorable yet unsettling sense of our insignificance in the scheme of things.

...

Stephen Baxter: Books

Evolution is a monumental tale of the very evolution of mankind, from the age of the dinosaurs to way into the distant future. Created by the multiple award winning author Stephen Baxter.

Book review of Evolution by Stephen Baxter

Following up his cosmic Manifold series, Stephen Baxter peers back on a more prosaic history in the worthy yet uneven Evolution. The book is nothing less than a novelization of human evolution, a mega-Michener treatment of 65 million years starring a host of smart, furry primates representing Homo sapiens's ancestry. Each stage of our ancestry is represented by a character of progressively increasing intelligence, empathy, and brain size, who must survive predation and other perils long ...
