Exercise 12 Earth–Sun Relations To life on this planet, the relations between Earth and the sun are perhaps the most important of all astro- nomical phenomena. The variations in solar energy striking Earth as it rotates and revolves around the sun cause the seasons and therefore are an appropriate starting point for studying weather and climate.

In this animation, we can see the orbit of the Earth as the planet travels around the Sun in one calendar year. By playing the animation, the Earth's revolution around the Sun shows that because of a constant tilt in the Earth's axis of 23.5 degrees, the Sun's rays illuminate different portions of the planet. The animation stops at the ...
