Florescein and ICG Angiography: Textbook and Atlas: Amazon ...

Fluorescein and ICG Angiography: Textbook and Atlas, 2nd ed. T his atlas is written predominantly by a German ophthalmologist in cooperation with a French and an American author. The work is divided into 20 chapters, the first 3 chapters of which are dedicated to the basic science and interpretation of fluorescein angiography. Two chapters, authored by Dr Yannuzzi, are dedicated to interpretation of indocyanine green angiography and an extensive discussion of occult choroidal neovascularization.

Fluorescein and ICG Angiography: Textbook and Atlas, 2nd ...

Fluorescein (FFA) and indocyanine green (ICG) angiography Fluorescein (FFA) and indocyanine green (ICG) angiography are simple diagnostic tests, which involve the injection of fluorescein (yellow) dye and/or indocyanine green into your bloodstream via a vein in your hand or arm, followed by a series of photographs taken over several minutes.

Fluorescein (FFA) and indocyanine green (ICG) angiography

Progression of various disease entities and treatment decisions, as well as guidance during laser treatment, often are based on fluorescein angiography. • ICG is an infrared-based imaging technique used to detect choroidal abnormalities and is specifically most useful for the detection of occult, poorly defined forms of choroidal neovascularization and can increase the number of patients potentially treatable, using laser photocoagulation.
