APPG on Agriculture & Food for Development. Follow @APPG\_Ag\_F4D. The APPG on Agriculture and Food for Development (APPG AgDev) brings together Parliamentarians concerned with agriculture, nutrition and food security in the developing world. The APPG recognises that a vibrant, resilient and environmentally sustainable agricultural sector is key to development and that agriculture is one of the most effective tools to ensure economic, social and political well-being in developing countries.

The global food system is expected to provide safe and nutritious food to a population that will likely grow from 7.5 billion people today, to nearly 10 billion by 2050. Not only will there be more mouths to feed, but as incomes grow in emerging and developing economies, so too will the demand for meat, fish, and dairy.

Sustainable agriculture and food security focuses on the availability of food now and in the future: a major concern of scientific and commercial communities world-wide. The prominence of this subject is driven by an increasing global population, pressure on non-renewable or scarce resources and a need to increase food production whilst minimising the impact on the environment.

Agriculture is the science and art of cultivating plants and livestock. Agriculture was the key development in the rise of sedentary human civilization, whereby farming of domesticated species created food surpluses that enabled people to live in cities. The history of agriculture began thousands of years ago. After gathering wild grains beginning at least 105,000 years ago, nascent farmers began to plant them around 11,500 years ago.
