~~Ford locking hubs and conversion kits - Ron the Parts Guy~~

The reason why the 'super duty' ford trucks have manually locking hubs is by design....for a vacuum actuated hub to work, the wheel needs to spin min 3/4 of a turn. SuperDuty trucks are 'work trucks' so they are often off road, plowing snow etc...if you were in 2WD and got stuck in a vacuum actuated system it would be near impossible to have those hubs lock in if they truck cant move.

~~ELI5: Why do Ford trucks have manual hubs, but nobody else ...~~

The automatic locking hub does it automatically on the fly. The locking mechanism inside an automatic locking hub is sort of like a one-way clutch. When torque is applied by the driveshaft, it forces the hub to slide in and lock. The hub then remains in the locked position as long as the transfer case remains in four-wheel drive.

This system uses auto-manual hub locks that can be engaged and disengaged automatically based on the 4x4 mode selected.

Download File PDF Ford Auto Manual Locking Hubs

It will increase fuel economy when used in the hub lock's recommended AUTO mode. For proper operation, make sure that each hub is fully engaged and that both hub locks are set to the same position (both set to LOCK or both set to AUTO). To engage LOCK, turn the hub locks completely clockwise; to engage AUTO, turn the hub locks completely counterclockwise. 2) Two Speed ...

is the actual Brazilian company that manufactures the manual locking hubs for Superwinch, therefore you can rest assured that you will get the top quality products.

~~1998-2000 Ford Ranger Manual Locking Hubs - The Ranger Station~~

Manual locking hubs are used to engage or disengage the front wheels to the front axle shafts. This reduces wear and tear on the front axle. Hub components are often made of cast aluminum and can break easily. Locking hubs are disconnected when the vehicle is put into two-wheel drive, and reconnected for changing back to four-wheel driving.

~~How to Disassemble a Ford
Manual Locking Hub | It Still Runs~~
When you have the hubs in Lock position the front axles are locked at all times. When you put in auto the hubs use vac to apply when you turn on the switch. The relays were bad about failing on the F250 that allow the hubs to engage.

V10. 4X4. manual/auto front hubs in either position. 4wheel drive will engage but will not stay engaged when under duress.

Meaning when I "REALLY" need it, it'll pop out of 4 wheel.

Mechanic's Assistant: Besides this, what condition is the Ford in? Excellent condition. I take care of my equipment. Have had Ford look at my front hubs twice.
