employers of forensic
scientists in this country
are police and agencies
whose major workload is
carrying out investigations
of criminal activity.

However, forensic science is
also a science that aids the
legal system, including the
civil courts and public
inquiries. The use of
forensic science even
extends to matters that do
not go to court, such as the
investigation of fires and
accidents on behalf of
insurance companies.

~~INVESTIGATION OF THE CRIME
SCENE | Forensic's blog~~

The bulk of modern forensic work involves the analysis of DNA or fingerprints left at a crime scene. In murder cases, forensic autopsies help work out how a person died. A range of more specialised and elaborate forensic techniques can be used to identify suspects in the most serious cases, such as tracking serial killers or terrorists.
