Organic Chemistry | freesciencelessons

Chemistry is the scientific discipline involved with elements and compounds composed of atoms, molecules and ions: their composition, structure, properties, behavior and the changes they undergo during a reaction with other substances.. In the scope of its subject, chemistry occupies an intermediate position between physics and biology. It is sometimes called the central science because it ...

Chemistry - Wikipedia

Define chemistry. chemistry synonyms, chemistry pronunciation, chemistry translation, English dictionary definition of chemistry. n. pl. chem·is·tries
1. The science of the composition, structure, properties, and reactions of matter, especially of atomic and molecular systems. 2.
